

OCONOMOWOC LAND USE PLAN

The Town of Oconomowoc Town Board contracted with Yaggy Colby Associates to prepare an updated land use plan. The land use plan was created as a general guide to the Town's overall development and growth, and was based on specific planning goals, objectives and policies established by a study committee. The study committee was comprised of local residents from various disciplines (i.e. farmer, business owner, lake resident), as well as a Town Board member and the Town Plan Commission members.

Various meetings of the study committee were held on a monthly basis. The firm, in cooperation with the Town, also held public informational meetings and a public hearing. Yaggy Colby Associates directed the preparation of the plan and provided mapping services to ensure its completion. The plan provides a sound basis for directing and coordinating the future development of the Town.
